PROFESSIONAL SUMMARY

Game Development student at Full Sail University with hands-on experience developing C++ applications using object-oriented programming. Experienced in creating game mechanics, implementing combat systems, debugging code, and managing projects with Git and GitHub. Interested in pursuing a career in game development and contributing to a team that creates and improves engaging games.

TECHNICAL SKILLS

Programming Languages: C++, HTML, CSS
Software & Tools: Visual Studio, Git, GitHub, Microsoft Office
Technical Concepts: Object-Oriented Programming, Classes and Objects, Functions, Game Logic, Turn-Based Combat, Input Validation, Debugging, Version Control, Branching, Pull Requests, Software Testing

TECHNICAL EXPERIENCE

Current Course Project

- Developed a C++ console application using object-oriented programming.
- Implemented multiple classes, functions, and user input validation.
- Used Git and GitHub for version control using commits, branches, and pull requests.
- Tested, debugged, and refined the application through iterative development.
- Created technical documentation and a project demonstration.

PROJECTS

Dungeon Crawler

Developed a text-based dungeon crawler where players navigate encounters, fight enemies, use healing potions, and work toward completing the game. Focused on building organized, maintainable code through separate classes and functions while implementing gameplay mechanics, testing edge cases, and improving the player experience.

Technologies: C++, Visual Studio, Git, GitHub
Repository: WilliamJA7/dungeon-crawler

Inventory & Crafting

Developed a console-based inventory and crafting application in C++ that allows players to manage a grid-based inventory and craft items from raw materials. Created four classes Item, Inventory, Recipe, and Player using object-oriented programming and separation of concerns. Implemented inventory management, crafting logic, and input validation while debugging and testing functionality. Also gained experience with inheritance, abstract classes, pointers, memory management, and SDL through a separate graphics visualizer project.

Technologies: C++, Visual Studio, Git, GitHub
Repository: WilliamJA7/Crafting-Sim

EDUCATION

Full Sail University

Bachelor of Science in Computer Science
Expected Graduation: December 2027

Relevant Coursework:
- Programming Fundamentals
- Object-Oriented Programming
- Software Development
- Version Control
